

Sheet (2)

(1) What are the functions of the following MATLAB commands:

- (a) clc, clear, clg, clf, ...,
- (b) save, save data, load, load data,
- (c) quit, exit
- (d) help sqrt, help, helpwin, helpbrowser, doc, doc sqrt, helpwin sqrt
- (e) who, whos, what, ls, dir
- (f) cd, pwd, cd .., cd path
- (g) mkdir elec, rmdir elec, delete file
- (h) type mfile, dbtype mfile, dbtype mfile start:end
- (i) break, pause, pause(n)
- (j) format long, format short,
- (k) format long e, format short e,
- (l) format long g, format short g,
- (m) format +, format bank, format compact
- (n) round, fix, ceil, floor
- (o) date, more on, more off
- (p) abs(x), sign(x), exp(x), log(x)
- (q) realmax, realmin
- (r) abs, angle, real, imag, conj
