(1) For Legendre polynomial P_m Prove that $\int_{-1}^1 xP_m(x)P_{m-1}(x)dx = \frac{2m}{4m^2 - 1}$

(2) Use generating function for Legendre polynomial to show that

$$P_{2m}(0) = (-1)^m \frac{(2m)!}{2^{2m} (m!)^2} \quad \text{and} \quad P_{2m+1}(0) = 0$$

(3) For the Bessel Function $J_m(x)$ show that $J_{1/2}(x) = \sqrt{\frac{2}{\pi x}} \sin x$.

(4) Use the relation $J_{n-1}(x) + J_{n+1}(x) = \frac{2n}{x} J_n(x)$ to find $J_{3/2}(x)$ and $J_{-3/2}(x)$.
